Our Company

In the heart of the timber industry, Cochin Group which owns Cochin Wood Industries (CWI) has emerged as a beacon of sustainable stewardship, economic prosperity, and community development. With a commitment to transforming timberlands into thriving ecosystems, we own and operate state-of-the-art manufacturing facilities that produce lumber and plywood while providing value beyond traditional timberland management. Today, We are one of the best Kerala plywood manufacturers from Perumbavoor, Kochi manufacturing marine plywood, hardwood plywood, commercial plywood, shuttering plywood, block boards, flush doors, particle boards, finger joint rubber boards, container flooring boards, plywood boxes, plywood pallets, plywood cable drums, and wooden boxes. Cochin Group was founded in 1986 with one saw-mill in Perumbavoor, Kerala, India. Our sweat and hard work, along with a founding group of pioneering employees, have laid the foundation for the Company, Cochin Group, that thrives to this day.

History

Established in 1986 in Perumbavoor, Kerala, India, Cochin Group embarked on its journey with a single sawmill, initially specializing in manufacturing packing case products. Over the course of 34 years, the company's steadfast commitment to quality and customer satisfaction has driven its evolution into a renowned entity in the wood industry.

Expanding beyond its humble beginnings, Cochin Group has diversified its offerings to include a comprehensive range of top-notch wood products. Through tireless dedication and a pioneering spirit, the company has grown exponentially, establishing itself as a reputable exporter of quality furniture, cable drums, pallets, packing cases, plywood and more.

Now, with its own factories and in partnership and work agreements with over 35 other manufacturing facilities, Cochin Wood Industries Private Limited has significantly expanded its reach. Through these collaborations, Cochin Wood supplies its superior products not only across India but also to global markets, solidifying its presence both domestically and internationally.

Driven by a culture of excellence and fueled by the vision of its founders, Cochin Group continues to thrive and innovate in an ever-evolving industry landscape. Today, Cochin Wood Industries Private Limited stands as a beacon of quality and reliability, embodying the legacy of its humble beginnings while embracing the challenges of the future with confidence.

Our Industries

PLYWOOD INDUSTRY

PACKAGING INDUSTRY

WOODEN INDUSTRY

PLYWOOD INDUSTRY

Cochin Wood Industries Private Limited stands as a cornerstone in the plywood industry, renowned for its quality and innovation. Founded with a vision to redefine standards, it has carved a niche for itself in the market. The company's dedication to excellence is evident in its meticulous manufacturing processes, ensuring every product meets stringent quality benchmarks.

With state-of-the-art facilities and a team of skilled professionals, Cochin Wood Industries excels in producing a wide range of plywood products tailored to meet diverse customer needs. From standard plywood sheets to specialized variants for specific applications, the company offers solutions that combine durability, strength, and aesthetic appeal.

Moreover, Cochin Wood Industries prioritizes sustainability, sourcing raw materials responsibly and implementing eco-friendly practices throughout its operations. This commitment not only underscores its corporate responsibility but also resonates with environmentally conscious consumers.

In essence, Cochin Wood Industries Private Limited epitomizes the pinnacle of craftsmanship and reliability in the plywood industry, setting a standard that others aspire to emulate.

COCHIN WOOD
INDUSTRIES PRIVATE LIMITED

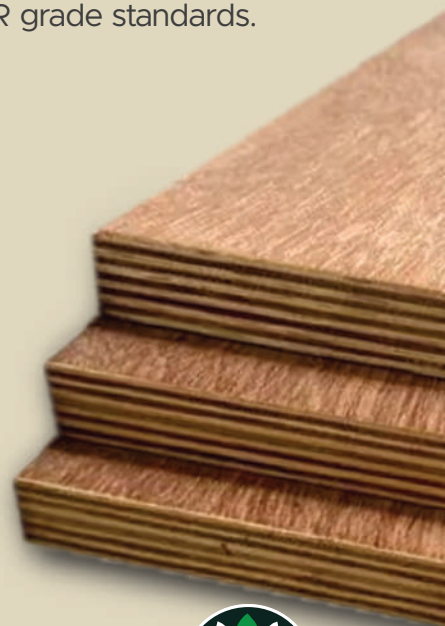

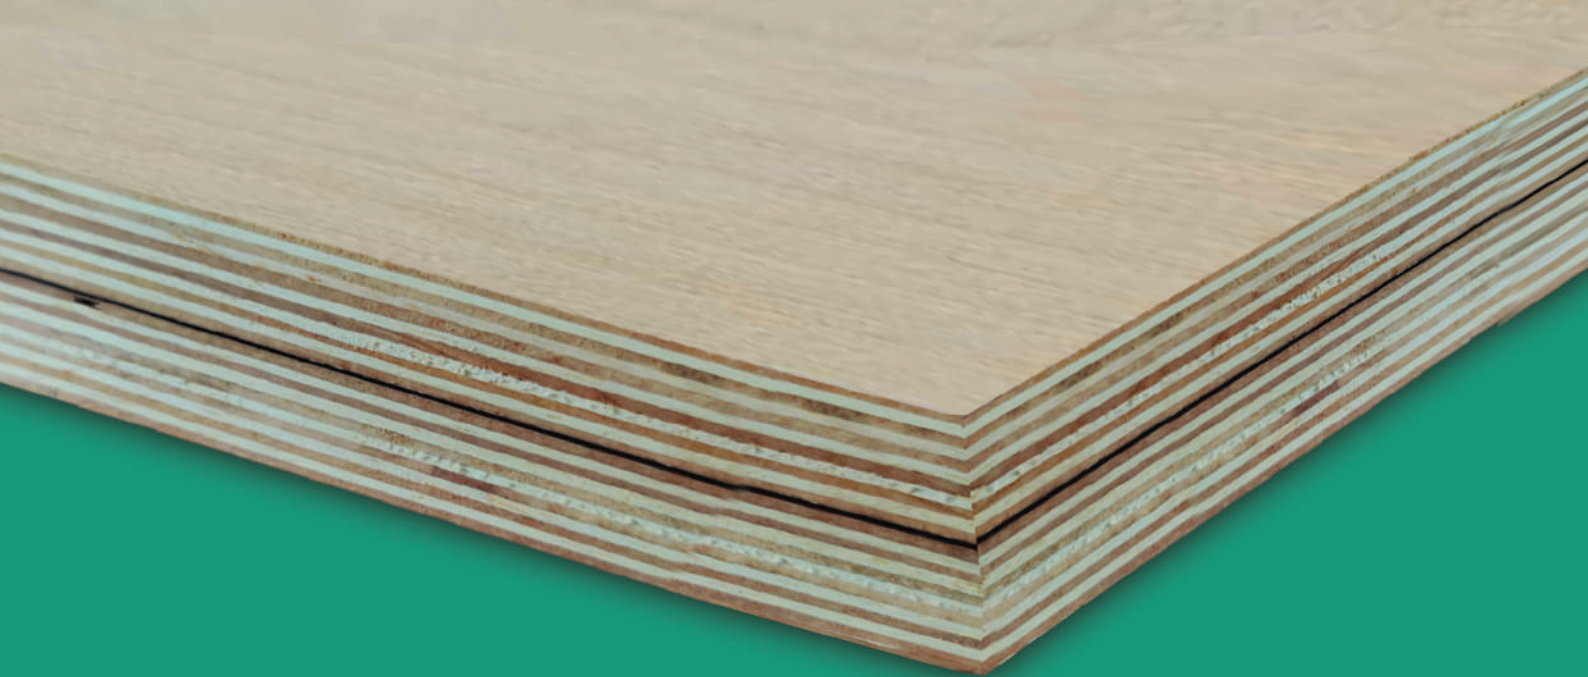

Marine **Plywood**

Marine plywood, specialized for moisture resistance, is indispensable in construction and wood working. Its durability and adaptability make it ideal for projects exposed to environmental elements. Understanding grades, applications, and maintenance ensures optimal performance in moist or wet conditions. Whether for boat building, outdoor furniture, or bathroom renovations, marine plywood stands as a reliable choice, offering longevity and resilience where standard plywood falls short.

Hardwood **Plywood**

Hardwood plywood is a highly regarded material in construction and furniture making, prized for its longevity, durability, and eco-friendliness. Comprising multiple thin hardwood layers arranged perpendicular to each other, it boasts exceptional strength and cost-effectiveness compared to solid wood alternatives. Manufactured through a process involving machine drying, melamine bonding, and chemical treatment, it undergoes high-pressure, high-temperature pressing. With a hardwood core, it offers resistance to borers and termites, meeting BWR grade standards.

Alternate **Plywood**

Alternate Plywood stands out for its exceptional quality and durability, making it ideal for diverse applications. This article delves into its unique attributes, manufacturing methods, appearance, and extensive uses. From homeowners to construction and furniture professionals, readers will gain insights into the benefits of Alternate Plywood. Crafted under stringent supervision, our production process entails meticulous selection of premium veneer species and precise gluing techniques, guaranteeing superior quality and performance.

MR Grade **Plywood**

Moisture-Resistant (MR) grade plywood is highly favored in construction and furniture industries for its capacity to endure moderate moisture levels. Its manufacturing process, advantages, and applications are thoroughly examined here. MR Grade Plywood stands as a dependable option for interior projects, providing water resistance, longevity, and cost-effectiveness. Suited for kitchen cabinets, bathroom furniture, and similar applications, it reliably withstands moisture. Procure from reputable suppliers to guarantee superior quality for your endeavors

Shuttering **Plywood**

In the realm of construction, materials play a pivotal role in determining the quality, durability, and efficiency of a structure. Film-faced shuttering plywood, often hailed as the unsung hero of the construction industry, offers a level of strength and bonding unparalleled by similar products in the market. We delve into the intricacies of film-faced shuttering plywood, with a particular focus on CWI, a trusted name in the industry. Our Film-faced shuttering plywood is crafted from high-density timber using cutting-edge technology in ultra-modern hot presses. The key differentiator lies in its manufacturing process, specifically the utilization of CPGL technology, which provides this plywood with extra strength and superior bonding capabilities.

Benefits of our Film-Faced Shuttering Plywood

Extra Strength

The high-density timber, coupled with CPGL technology, guarantees a level of strength that sets it apart from competitors.

Better Bonding

The plywood forms a superior bond with concrete, ensuring stability during construction.

Versatility and Usability

It is suitable for a wide range of construction projects, from residential buildings to commercial structures.

Cost-Efficiency and Sustainability

It not only saves costs by enabling multiple repetitions.

Container Flooring Plywood

Container flooring plywood is crafted from thin veneers of matured hardwood, meticulously stacked and bonded under heat and pressure with synthetic thermosetting resin to ensure durability. This method yields a robust product capable of withstanding cracking, shrinkage, twisting, and warping. Typically, standard shipping container flooring comprises hardwood plywood, predominantly made from Eucalyptus or Rubberwood, with a thickness ranging from 25 to 30mm. While varnishing is occasionally applied, the prevailing trend favors a plain finish, prioritizing cost efficiency. Although timber plank flooring was common in older containers, the contemporary inclination leans heavily towards plywood due to its superior qualities. However, the availability of hardwood is dwindling, prompting container companies to explore alternative materials through trial runs.

Recommended applications include containers, trailers, and warehouse flooring.

Properties

Universal	Multilayer	Flooring Panel	Excellent	Wear	Resistant
Slip	Surface	Strong	Durable		

Size & Thickness : Width : 1224 mm | Length : 2448 mm

Thickness : 28mm (custom sizes are available as per customer's requirements).

Flush Doors

Flush doors, precisely manufactured to meet stringent ISI standards, effortlessly enhance the sophistication of any living space. Engineered with chemically treated battens and frames, they boast exceptional resistance to pests, rot, and moisture, ensuring prolonged durability and minimal maintenance. Their versatility extends to design options, accommodating various architectural styles while offering enhanced sound insulation for added comfort. With an emphasis on quality control during production, flush doors deliver not only aesthetic appeal but also practical advantages, making them a preferred choice for discerning homeowners seeking long-lasting elegance and functionality.

Block Boards

Block boards, renowned for their robustness and versatility, are meticulously fashioned from a blend of carefully selected, seasoned Pinewood. Through a precise manufacturing process, they are fortified with Melamine-reinforced Urea Formaldehyde Resin for MR grade or Phenol Formaldehyde resin for BWP grade. This craftsmanship results in boards highly resistant to distortion, exhibiting exceptional screw and nail retention, attributed chiefly to the quality of Pinewood used. Essentially, block boards comprise a core of wooden battens sandwiched between layers of face veneer, all expertly bonded with premium resin. Their enduring strength and adaptability render them indispensable across various applications.

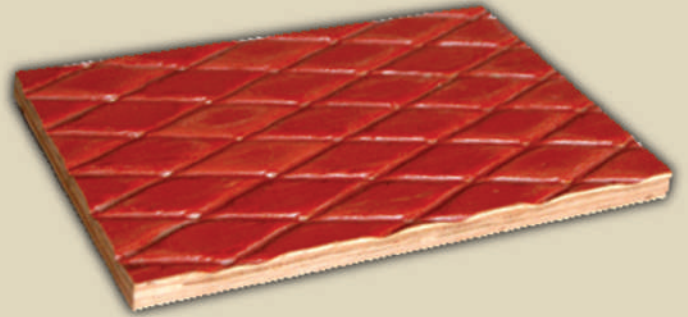

COCHIN WOOD
INDUSTRIES PRIVATE LIMITED

Chequered Plywood

Chequered plywood stands out as a premier choice for transportation applications, boasting a distinct surface pattern that enhances its functionality. Engineered under high pressure, this panel achieves a remarkable density, rendering it capable of withstanding heavy traffic, making it ideal for public and industrial flooring.

Its anti-skid properties make it particularly well-suited for flooring in heavy vehicles and large containers, offering enhanced safety and stability. Moreover, it finds versatile utility in the automotive sector, serving as an effective material for applications like ceiling construction, paneling, and seat backrests.

Available in thicknesses of 12, 15, 19, and 25 mm, with corresponding weights ranging from 33 to 44 kg, this plywood caters to diverse project requirements. Furthermore, it is offered in sizes spanning from 5.5 x 2.5 feet to 10.5 x 5.5 feet, ensuring flexibility in installation and usage.

With a density range of 0.845 to 1.20 gm/cm³, this product combines durability with practicality, making it a preferred choice for demanding environments.

Packaging **Industry**

At Cochin Wood Industries Private Limited, we take immense pride in our position as a revered leader within the wooden packaging industry. Our journey, steeped in heritage spanning several decades, reflects our unwavering commitment to quality, sustainability, and innovation. Crafting tailored wooden packaging solutions is our forte, where pallets, crates, boxes, and custom designs cater to diverse industrial needs.

We prioritize sustainability, conscientiously sourcing timber and employing eco-friendly production practices. Our goal is to minimize environmental impact while ensuring the safe transportation and storage of goods. With skilled artisans and cutting-edge facilities at our disposal, we consistently deliver packaging solutions that meet global standards.

Our success is rooted in our dedication to fulfilling client requirements with precision and reliability. We foster enduring partnerships based on trust and mutual growth, placing our customers at the heart of our operations. As industry pioneers, we continually push boundaries, striving for innovation and setting new benchmarks for excellence in wooden packaging. Our commitment to quality and sustainability remains unwavering as we evolve and shape the future of the industry.

PACKAGING

Packing Boxes

In the ever-evolving landscape of global supply chains, the role of packaging boxes, be it wooden or plywood, remains indispensable for safeguarding goods during transit and storage. Among the array of packaging options available, our packaging boxes have emerged as reliable stalwarts, offering unmatched protection and versatility.

Wooden Packaging Boxes

Wooden packaging boxes stand out for their ability to be tailored to specific needs, whether standard or customized. Their robust construction makes them ideal for packaging a wide range of goods, from light and fragile items to medium and heavy loads. With both standard and customized finish specifications available, wooden packaging boxes provide optimal solutions for diverse packaging requirements.

Plywood Packaging Boxes

In India's booming plywood packaging sector, we prioritize quality, affordability, and customer contentment. Our diverse plywood box selection serves industrial packaging, shipping, and storage needs with unmatched excellence. We're the go-to choice for superior plywood packaging solutions across various industries.

COCHIN WOOD
INDUSTRIES PRIVATE LIMITED

PACKAGING

Pallets

Pallets serve as the backbone of logistics and transportation, facilitating the efficient handling and storage of goods within supply chains. These flat structures form the foundation of unit load systems, ensuring stability during lifting by machinery like forklifts and pallet jacks

Wooden Pallets

Wooden pallets emerge as a preferred choice in the pallet landscape, renowned for their durability and adaptability. CWI, a prominent manufacturer and wholesaler, offers a diverse array of standard and custom-sized wooden pallets to meet varied transportation and storage needs. Renowned for their ability to support heavy loads and compatibility with different handling equipment, wooden pallets guarantee the secure transport of goods across supply chains.

Plywood Pallets

Complementing traditional wooden pallets, CWI specializes in plywood pallets, providing a tailored solution to specific requirements. Constructed using layers of wood veneer bonded together, plywood pallets offer a lightweight yet robust option for transporting goods. With customizable sizes and configurations, these pallets optimize space utilization and enhance efficiency in material handling operations.

Crates

A crate is a robust container used for storing, transporting, or shipping goods securely. We are renowned suppliers of wooden packing crates in India, specializing in crafting effective solutions for packaging and transportation needs.

Wooden Crates

Our Wooden Crates, meticulously crafted from premium rubber and silverwood, prioritize optimal protection while meeting diverse client needs. Engineered to accommodate various sizes, shapes, and weights, they shield products from shocks and vibrations, ensuring secure transportation for domestic manufacturing, export, or logistics purposes.

Plywood Crates

Complementing our Wooden Crates, our Plywood Crates are tailored to industry-specific demands. Crafted with precision, they offer versatility and durability, ensuring safe transit for products of varying sizes and fragility. From delicate electronics to robust machinery, Plywood Crates provide reliable protection, meeting the unique requirements of diverse industries.

Cable Drums

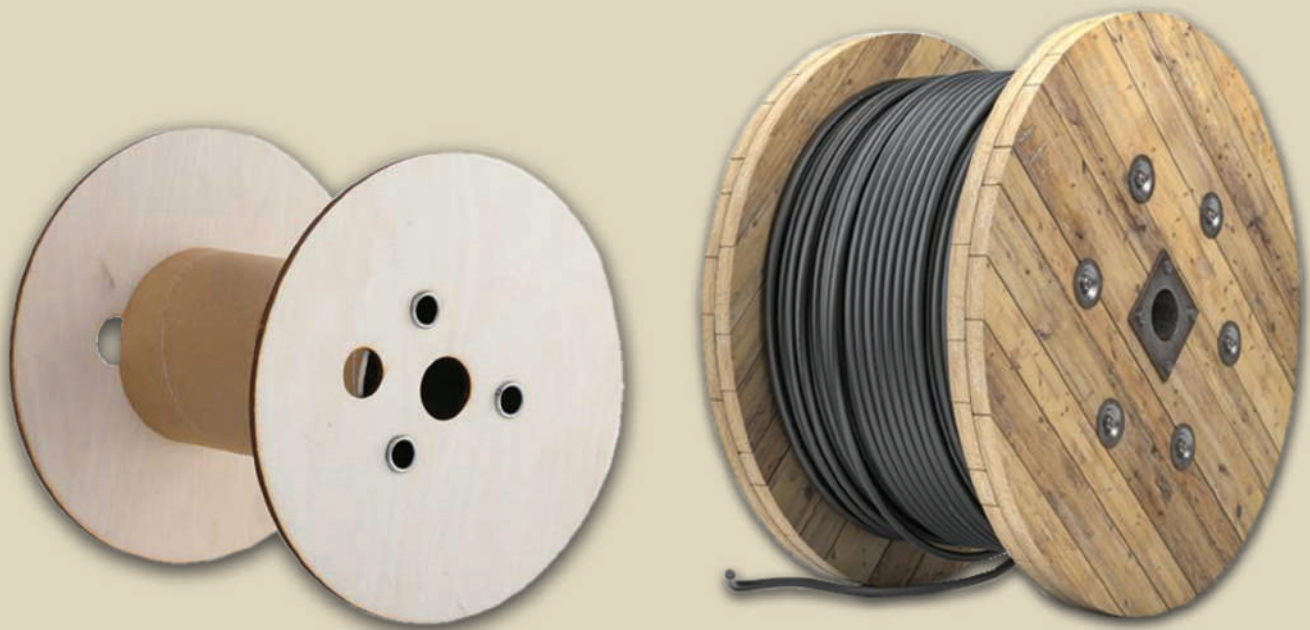

Cable drums are indispensable in the transportation and storage of electric cables, fiber optic cables, and wire products. They come in two primary types: wood cable drums and plywood cable drums. Each type boasts unique characteristics and applications, catering to diverse needs across various industries.

Wooden Cable Drums

Wood cable drums have long been a cornerstone in the cable industry, offering robust solutions for heavy-duty applications in construction and infrastructure sectors. Crafted from various sturdy wood, these drums are renowned for their durability and reliability. Their time-tested design ensures optimal performance, making them a preferred choice for demanding environments.

Plywood Cable Drums

We excel in crafting top-notch plywood drums and reels, establishing themselves as a trusted provider of packaging solutions. By utilizing premium-grade plywood materials, we ensure that their plywood drums meet the highest standards of quality and durability. Termite resistance and impeccable finishing are inherent features, thanks to the use of superior materials. Moreover, we offer customization options, tailoring drums to the specific needs of clients, thus ensuring a perfect fit for their packaging requirements.

COCHIN WOOD
INDUSTRIES PRIVATE LIMITED

Sawmill Industry

Cochin Wood Industries Private Limited operates a cutting-edge sawmill facility, specializing in processing hardwoods and softwoods sustainably sourced from managed forests. With state-of-the-art machinery and a skilled workforce, the company ensures top-quality wood products from raw logs to finished lumber. Emphasizing eco-friendly practices, such as waste recycling and energy conservation, Cochin Wood Industries minimizes its environmental impact while maximizing efficiency. Dedicated to customer satisfaction, the company offers a diverse range of wood products tailored to various industries. Safety is paramount, with stringent protocols and ongoing employee training ensuring a secure workplace. Cochin Wood Industries stands as a leader in the sawmill industry, known for its commitment to quality, sustainability, and customer service.

Sawmill Industry Timber types

Cochin Wood Industries' Sawmill division provides a versatile range of timber products tailored to diverse needs. With a commitment to quality and precision, Cochin Wood Industries delivers premium timber solutions, meeting the demands of professionals and DIY enthusiasts alike.

Planks : It is a long timber piece with parallel sides of width more than 50mm and thickness less than 50 mm.

Baulks : Baulk is a piece of timber obtained by removing the bark and sapwood, which looks roughly square-shaped. The cross-sectional dimensions are usually more than 50 mm on one side and more than 200 mm on the other side.

Runner/Battens : A Batten is a strip of timber, of thickness 2 to 4 inches and breadth 5 to 8 inches. It is used in roofing, flooring, ceilings, wall and other construction applications.

Boards : It is a plank of timber with parallel sides, thickness not exceeding 50 mm and width exceeding 200 mm.

Sawmill Industry **Wood types**

Cochin Wood Industries' Sawmill division meticulously curates and crafts products from a diverse selection of premium woods. Cochin Wood Industries also accommodates requests for other premium Indian wood timbers such as teak, ensuring that customers' specific needs and preferences are met with the utmost attention to quality and craftsmanship.

Some of them are

- ✓ Mahogany stands out for its opulent reddish-brown hue and exceptional durability, making it the preferred choice for crafting timeless furniture pieces and intricate carvings that epitomize elegance and sophistication.
- ✓ Acacia, renowned for its distinctive grain patterns and natural strength, is favored for crafting outdoor furniture that effortlessly withstands the elements while infusing a rustic charm into outdoor spaces. Its durability and resilience make it an ideal option for enduring outdoor use without compromising on aesthetic appeal.
- ✓ Rubberwood, highly esteemed for its eco-friendly properties and remarkable resilience, undergoes expert craftsmanship to produce sturdy wooden packaging products. Its innate ability to withstand wear and tear ensures the creation of strong furniture that maintains its aesthetic appeal over time.
- ✓ Silverwood, distinguished by its captivating silvery sheen and exceptional versatility, finds its place in crafting decorative accents and specialty items that elevate interior designs. Its unique aesthetic qualities make it a sought-after choice for creating statement pieces that command attention in any room.

COMMITTED TO THE ENVIRONMENT

At Cochin Wood Industries, our environmental commitment is unwavering. We strictly adhere to sourcing all our timber from meticulously managed plantations and controlled sources. By utilizing plantation wood and homegrown timber exclusively in all our manufacturing processes, we uphold our pledge to protect forests from harm. This approach ensures that replantation efforts are conducted regularly, fostering sustainable forestry practices and minimizing environmental degradation.

Our dedication to environmental stewardship extends beyond mere compliance; it's ingrained in every facet of our operations. We recognize the critical importance of preserving natural ecosystems and strive to minimize our ecological footprint at every opportunity. By prioritizing responsible sourcing and production methods, we aim to set a standard for sustainable practices within the industry.

At Cochin Wood Industries, sustainability isn't just a buzzword—it's a core value that guides our decision-making processes and shapes our business practices. We believe that by championing environmentally conscious initiatives, we can make a meaningful contribution to safeguarding our planet for future generations
